

Dr. Ildikó ORGONA
National Development Agency
Head of the Unit of Irregularity Management and Monitoring

I graduated at the Faculty of Law of the University of Miskolc, in 2004. I have the bar examination and the qualification of public procurement referent. I have been dealing with development policy since May 2005. First I worked for an intermediate body, the Váti SARL, where I participated in the quality assurance of support contracts, the investigation into irregularities and other legal tasks related to the execution of the National Development Program.

Since February 2008, I have been working for the Coordination Managing Authority of the National Development Agency. My professional duties were connected to regulation and the development of a uniform practice of law application, in particular with regard to irregularity management, conclusion of contracts and monitoring of public procurement.

In October 2010, I became the Head of the Unit of Irregularity Management and Monitoring at the Legal Department. The Unit deals with the investigation into the suspicions of irregularity falling within the competence of the National Development Agency and with the proposals for decision presented to the competent Supervising Authority, furthermore, it participates in the amendment of the legislation and procedures related to irregularity management, as well as in giving an opinion on the conclusions of the Supervising Authority.
